

What is my Operating System Version & is it 32-bit or 64-bit?

For Windows 7

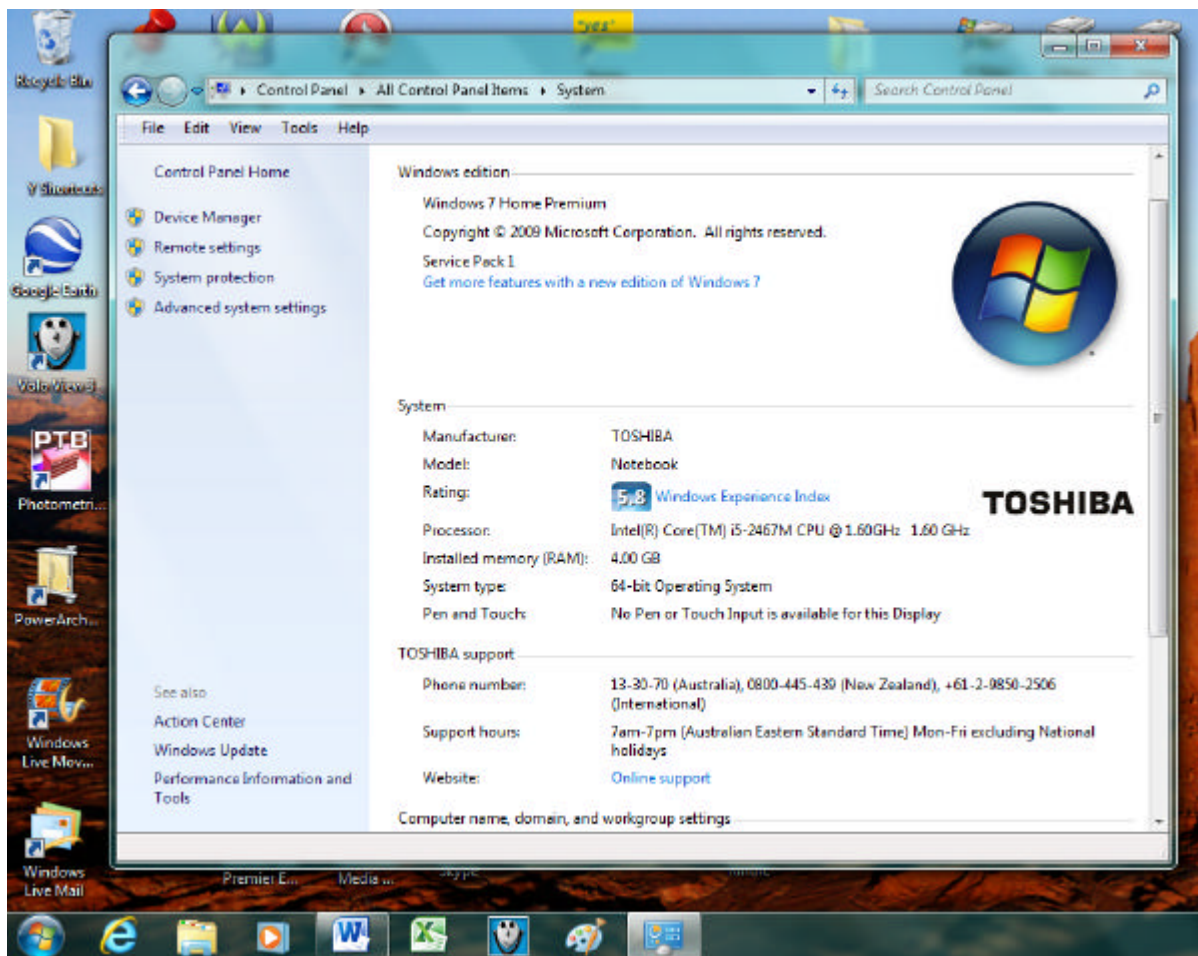

Click on the Start orb and select the **Control Panel** item.

Then double click on the **System** icon.

At the top of the subsequent screen it shows the **Windows edition** (eg. Windows 7 Home Premium) and further down see opposite **System type**: whether 32-bit or 64-bit.
